

ISLAMORADA, VILLAGE OF ISLANDS
DESIGN-BUILD-OPERATE WASTEWATER SYSTEM
ISLAMORADA, FLORIDA

Project Description

The purpose of the Project was to ensure that all wastewater is collected and treated to State of Florida mandated levels prior to disposal and to ensure safe and reliable wastewater collection and treatment for the community. Additional project considerations included minimizing potential environmental impacts on the Village and surrounding areas, with regard to habitat conservation, marine protection, endangered species and habitat, air and water quality, greenhouse gas emissions, wetlands and estuary preservation or enhancement. The DBO scope included: Modifications to the existing NPK and Key Largo wastewater treatment facilities for additional flow, equalization and aeration, 1 Master Pump Station and 4 Vacuum Pump Stations, 7 Ocean Channel Creek crossings using HDD from 8"-18", Hybrid Vacuum/Low Pressure Grinder collection system consisting of approximately 400,000 LF of 3" to 10" PVC and HDPE Pipe, Transmission System consisting of approximately 100,000 LF of 8" to 18" PVC and HDPE, 1.25" HDPE Service Line- approx. 100,000 LF, Service to approximately 5,000 customers, and installation of 434 residential grinder pumps.
